EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science in Computer Engineering • GPA: 3.72/4.00

Jun. 2023

Minor in Data Science • GPA: 4.00/4.00

Relevant Courseworks • Artificial Intelligence, Machine Learning, Computing and Informatics Design, Applied Deep Learning

SKILLS

Programming Languages: Python, Typescript, C#, JavaScript, Node.js, HTML, CSS

Tools & Frameworks: ASP.NET Web API, SQL Server, FastAPI, Redis, Docker, Kubernetes, OpenCV, React.js, Jetson Nano

GenAI & LLM Integration: LangChain, LangGraph, AutoGen, Gemini, Amazon Bedrock, AWS SageMaker, vLLM

EXPERIENCE

Nvidia

Ho Chi Minh, Vietnam

AI Engineer

Feb. 2026 - Present

- Optimize end-to-end deep learning training loops, targeting a **20-30% reduction** in latency and maximizing GPU clock-cycle utilization across datacenter workloads.
- Architect automated profiling workflows for **LLM inference** (e.g., TRT-LLM), aiming to cut manual workload analysis time by **50%** for research and engineering teams.
- Drive cross-layer performance strategies (Silicon to Framework) to support exponentially scaling cluster deployments and influence the **3-5 year** hardware roadmap.

Coinbase

Remote, USA

Software Engineer

Jun. 2023 - Jan. 2026

- Maintained **99.9% uptime** for critical contract and customer query services, handling **5000+ requests** per day by optimizing factory-patterned microservices (Python, TypeScript).
- Accelerated internal data retrieval speed by **25%** and improved query accuracy for VISDOM AI by architecting a hybrid RAG framework (dense + sparse) over pgvector and Elasticsearch.
- Engineered **8+ critical front-end features** using React.js and ASP.NET MVC 5 as part of a major UI revamp

INTERNSHIPS & PROJECTS

Drexel College of Computing (Bloomberg-sponsored Senior Design)

Princeton, NJ

Software Engineer Contractor

Sep. 2022 - Jul. 2023

- Engineered software system that handles creation of vLEIs for Bloomberg's partners over **200+ countries** (Miro, Figma)
- Integrated back-end system with web app that collects required information for vLEIs generation (Python, React.js)
- Deployed vLEIs purchasing flow on Bloomberg's terminal within **9 months**, increase profit margin to **20%** (Stripe)

Susquehanna International Group (SIG)

Bala Cynwyd, PA

Software Engineer Co-op

Sep. 2021 - Mar. 2022

- Maintained low latency hardware system that handle trading logics to verify **10000+ daily trading records** (Python)
- Implemented multi-threaded programming to store **3000+ XML files** of trading histories to database (C#, SQL)

Mock&Roll - AI Interview Agent • Best AI Hack - Philly Codefest

Feb. 2022

- Developed an AI-powered interview platform using OpenAI and TensorFlow to analyze user responses, generating real-time feedback across **2 distinct skill categories** (technical and soft) in under **5 seconds**.

DeepSign Game • 1st Place Overall and Best Social Good Hack - Drexel DragonsHack

Apr. 2021

- Engineered a deep learning model for ASL gesture recognition using Python and TensorFlow, training it for over **8 hours** on a large-scale Kaggle dataset to interpret finger tracking data for real-time game commands.

LEADERSHIP & AWARDS

Drexel Institute of Electrical and Electronics Engineers (IEEE) • President

Jun. 2021 - Jun.2022

- Directed organization of **25+ officers** to host **20+ social** gatherings and technical workshops for **500+ members** annually
- Oversaw committee of **10 members** to organize DragonHacks for **200+ participants** with the total prizes of **\$30,000**
- Received **\$6000** IEEE Leadership Scholarship as a racially diverse college student that contributes to IEEE organizations
